Dear Ian

**SOUTH EAST ENGLAND REGIONAL ASSEMBLY SELECT COMMITTEE ON  
REDUCING THE ECOLOGICAL FOOTPRINT**

I am grateful for the copy of the Regional Assembly's Select Committee report on Reducing the Ecological Footprint here in the South East.

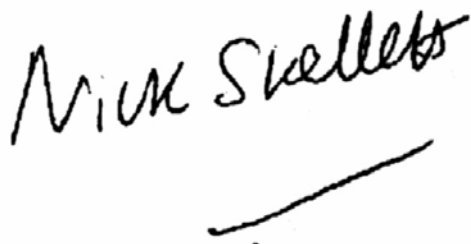

As I reported to the Assembly's Plenary in November 2007, the Regional Transport Board has set in motion four discrete but complimentary work streams specifically targeted at encouraging progress with the implementation of the mobility management framework set out in the Regional Transport Strategy.

One of the four workstreams is focused on taking forward the development of an easily accessible source of guidance and advice on mobility management. The RTB secretariat is exploring with ACT/Travelwise the extent to which this might build upon work already underway at the national level.

As Chairman of the Regional Transport Board I provide regular reports its work to the Assembly's Executive Committee. I will ensure that progress with this key area is included within my reports to the Committee.

With kind regards.

Yours,
