

International Migration 2007: First Release

Background

On 19 November 2008 the Office for National Statistics (ONS) published the first release of 2007 Total International Migration (TIM) estimates for the UK. TIM is the official estimate of long-term migration covering flows to and from the UK. More detailed TIM data will be released in Spring 2009 as part of the ONS International Migration MN series.

The press release and tables are available at the following links:

- www.statistics.gov.uk/pdfdir/tim1108.pdf
- www.statistics.gov.uk/STATBASE/Product.asp?vlnk=15053

In this Update migrants are defined as persons intending to stay in the UK or remain outside the UK for at least a year.

Results

In 2007 an estimated 340,000 persons emigrated from the UK (Table 1). This was a decrease of 60,000 persons (15.0%) from the record high emigration of 400,000 persons in 2006 (Figure 1). The international inflow of migrants also declined from 591,000 in 2006 to 577,000 in 2007 (2.4% decrease). Overall net international migration (the difference between immigration and emigration) increased by 46,000 between 2006 and 2007 due to emigration showing a larger decrease than immigration. In 2007, the UK had an estimated net inflow of 237,000 persons.

In contrast to the UK the South East experienced small increases in both emigration and immigration flows between 2006 and 2007 (Figure 2), and had a increase in net international migration from 28,000 to 30,000.

Time Trends

Inflows of international migrants to the UK rose from 1997 to 2004 (Figure 1), and since then have remained fairly stable. The peak inflow of international migrants occurred in 2006, with 591,000 migrants moving to the UK from overseas. The average inflow since 2004 has been 579,000 a year.

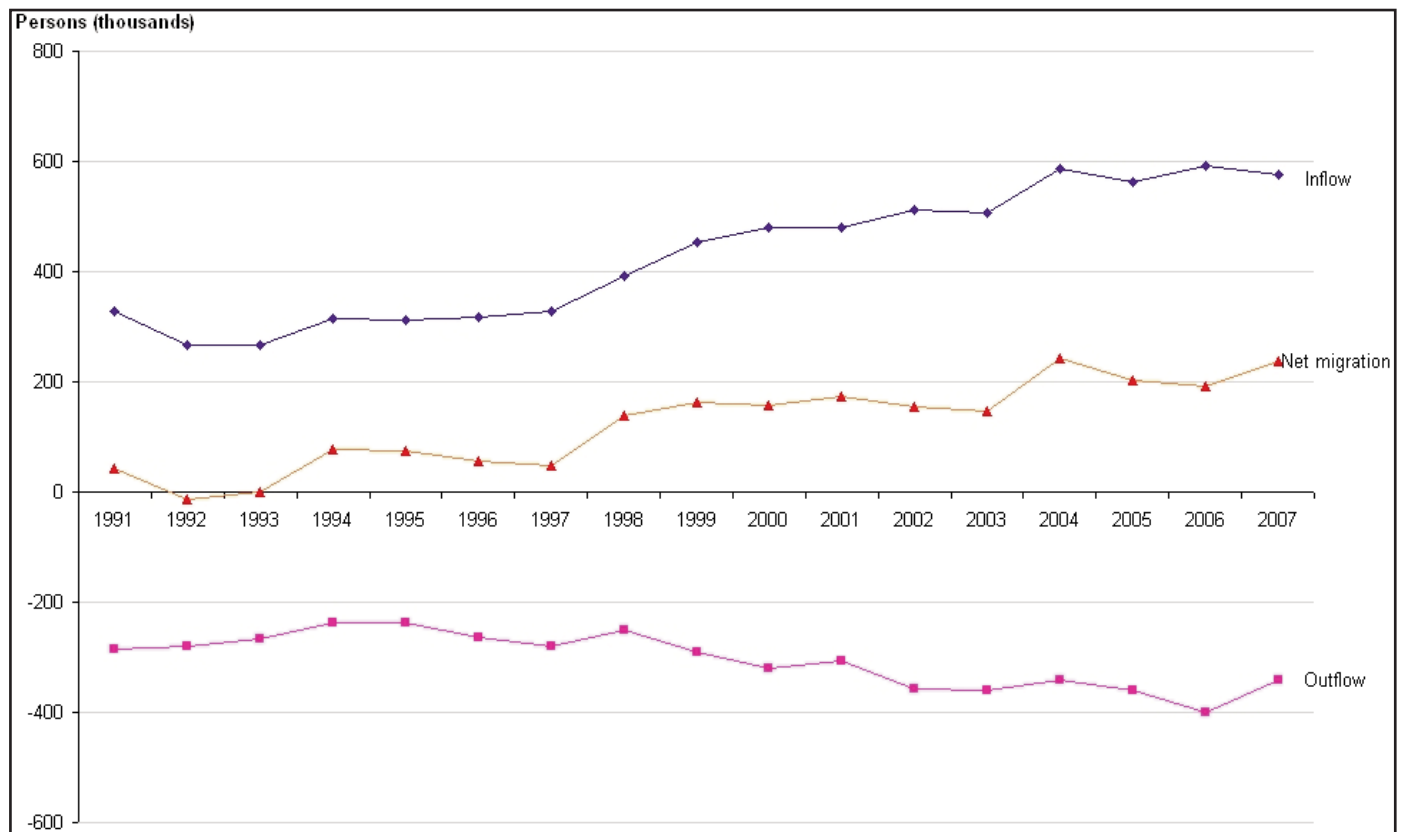

The number of people emigrating from the UK has shown an increasing trend since 1998. 2007 is the first year since then in which there has been a large decrease in the outflow of international migrants.

Table I: International Migration: by Country and Region, 2007 (thousands)

	Inflow	Outflow	Net migration
United Kingdom	577	-340	237
Great Britain	567	-334	234
England and Wales	527	-306	221
England	511	-299	212
Wales	16	-7	9
Scotland	41	-28	13
North East	18	-10	8
North West	38	-33	5
Yorkshire and Humber	43	-20	23
East Midlands	33	-19	14
West Midlands	36	-18	18
East	62	-31	31
London	162	-92	70
South East	84	-54	30
South West	35	-22	14

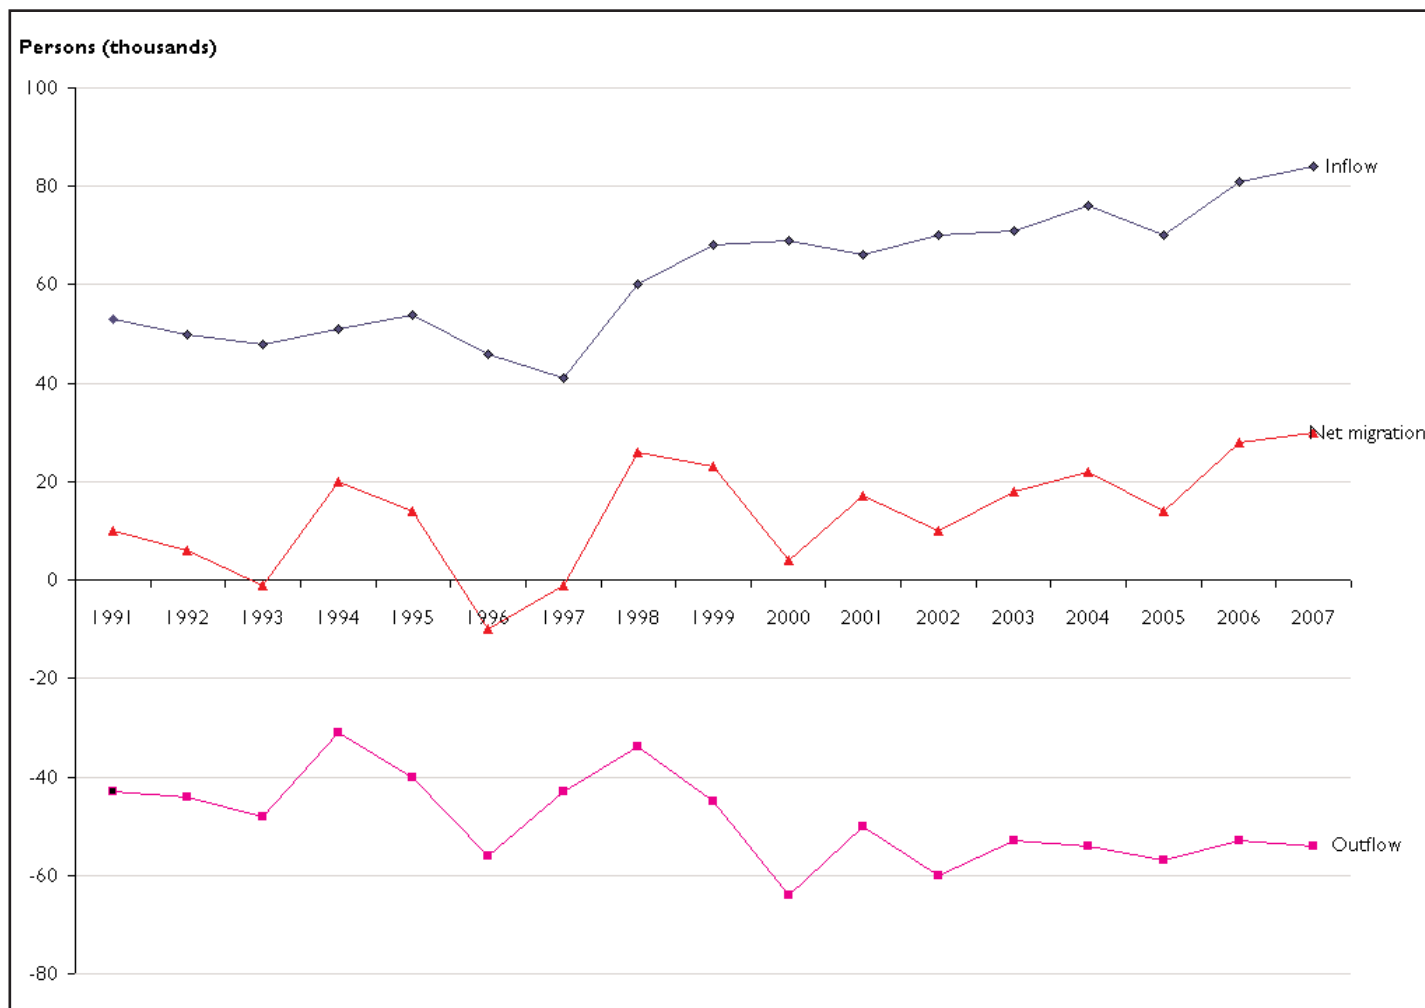

A full table for all countries and 1991-2006 is given in Appendix Table I with complete footnotes.

Figure I: UK International Migration Flows, 1991 to 2007

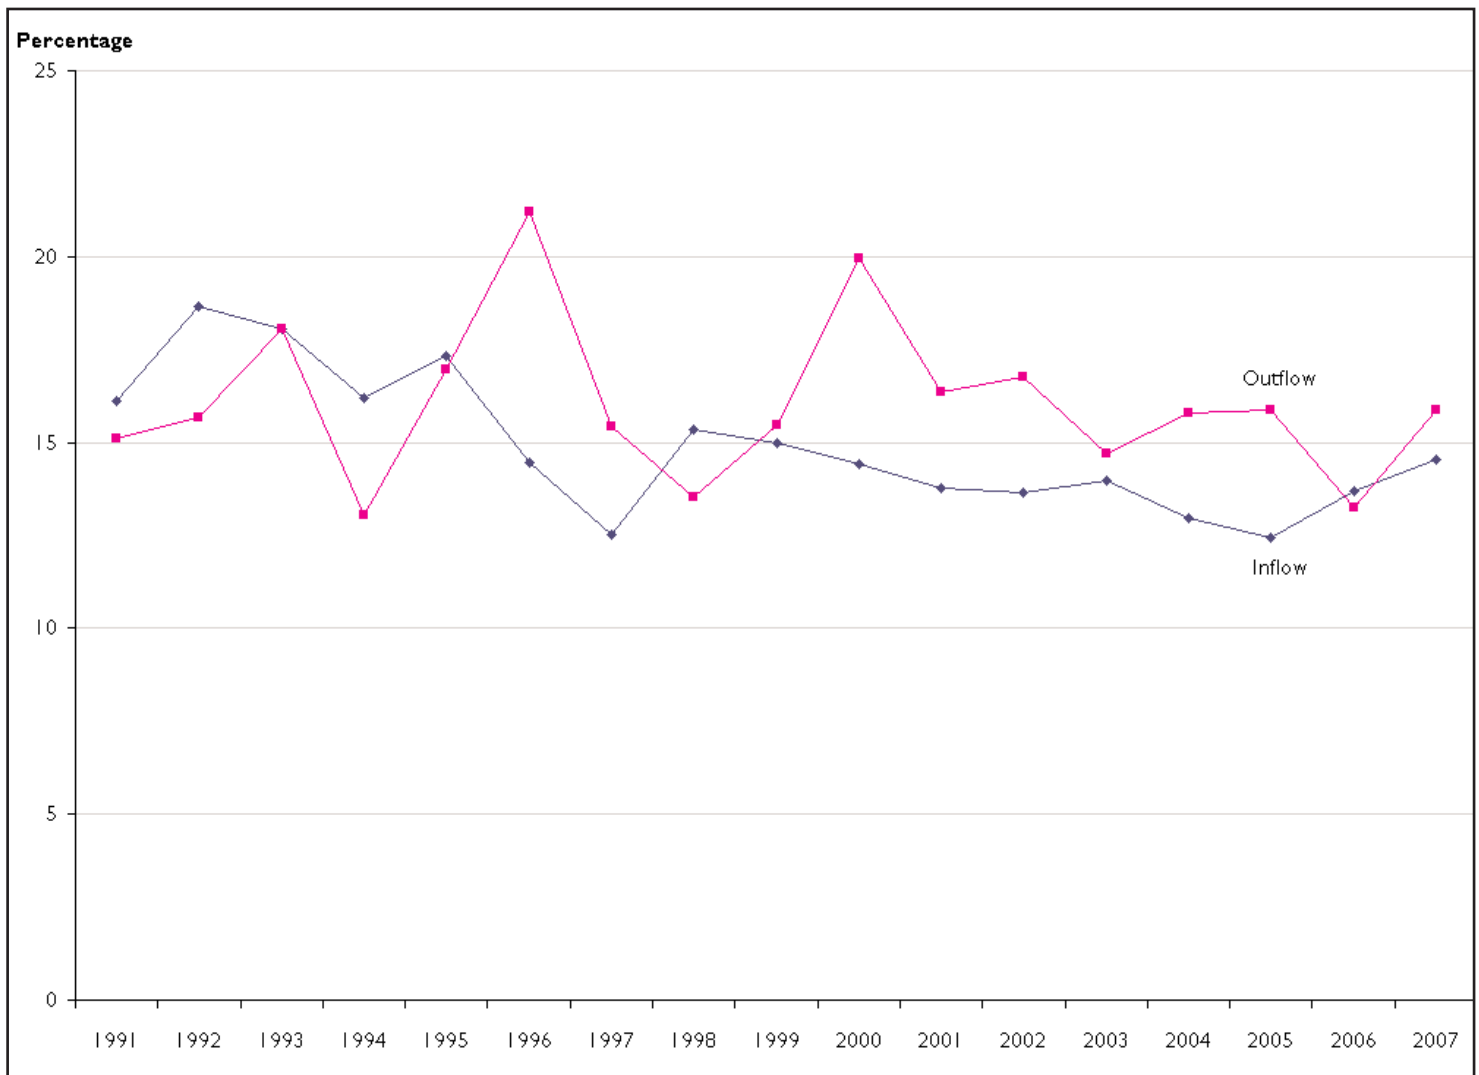

The South East has seen a similar increase in immigration from 1997 onwards as the UK as a whole experienced. In 2007 the South East had the highest annual inflow and net migration to the region since 1991, when data started to be recorded in the current way. The number of people emigrating from the South East has remained at a similar level since 2003. The average for the last five years was an outflow of 54,000 persons a year.

Figure 2: South East International Migration Flows, 1991 to 2007

The South East has the second highest share of the UK's inflow, outflow and net international migration, with London having the largest proportion for all three elements. In 2007 15% of the inflow to the UK and 16% of the outflow from the UK were attributable to the South East (Figure 3). The percentage inflow declined from 1998 to 2005, but for the last two years has increased. Although the flow of international immigrants into the South East reached a record high in 2007, the South East's share of the UK international inflow is not as high as it was at its peak in 1992.

Figure 3: South East's Percentage Share of UK International Migration Flows 1991 to 2007

Citizenship

There was a decrease in immigration to the UK between 2006 and 2007 for all citizenship groups, except citizens of the European Union (Table 2). The increase in inflows of EU citizens was both for the original EU 15 countries and the EU A8 countries. There were 11% and 22% increases of inflows of immigrants from EU 15 countries and EU A8 countries respectively between 2006 and 2007. International immigration from the EU A8 countries has increased by 111% since these countries joined the EU in 2004.

There has also been a corresponding increase in the number of EU A8 citizens emigrating from the UK since 2004, with a 14% increase in numbers between 2006 and 2007. The EU A8 and the New Commonwealth were the only citizenship groups that showed increases in numbers of emigrants between 2006 and 2007.

The flow of people emigrating from the UK in 2007 was evenly composed of British (50.3%) and non-British citizens (49.7%). However, 87.0% of the inflow was formed of non-British citizens. EU citizens formed the largest (34%) proportion of immigrants to the UK in 2007, followed by Commonwealth citizens (30%) and then citizens classed as Other foreign (23%). Migrants from the EU A8 countries made up 19% of the inflow of immigrants and 7% of the outflow of emigrants for the UK in 2007.

The 1991-2005 estimates were revised following changes to the TIM methodology in November 2007. Therefore they may not agree with estimates published previously.

1 Northern Ireland data are included in the United Kingdom total but are no longer shown separately. The methodology for Northern Ireland is currently under review as there are factors that make it particularly difficult to estimate international migration into and out of Northern Ireland.

2 The estimates for Scotland have been revised. However, international migration estimates for Scotland for the purposes of estimating population change will not be revised and so there may be some differences.

Figures have been rounded independently and may not add to totals

+ denotes a net inflow

- denotes a net outflow

The 1991-2005 estimates were revised following changes to the TIM methodology in November 2007. Therefore they may not agree with estimates published previously.

1 European Union estimates are for the EU15 (Austria, Belgium, Denmark, Finland, France, Germany, Greece, the Irish Republic, Italy, Luxembourg, Netherlands, Portugal, Spain and Sweden) from 1991 - 2003, EU25 (EU15 and A8 groupings plus Malta and Cyprus) from 2004 - 2006, and for the EU27 (EU25 plus Bulgaria and Romania) from 2007. Estimates are also shown separately for the EU15 and the A8 (the Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Slovakia and Slovenia). British citizens are excluded from all groupings and shown separately.

2 From 2004 onwards, All and the New Commonwealth excludes Malta and Cyprus.

3 From 2004 onwards, Other foreign excludes the eight central and eastern European member states that joined the EU in May 2004. From 2007 onwards, Other foreign excludes Bulgaria and Romania which joined the EU in January 2007.
